## Projects

---

### Blog

-> It is built over HTML , CSS , Bootstrap , Django(Python web framework)  
-> It is more like a forum where authorised users can create , edit , delete , publish a post and where as the other users can just comment on it.

### Tourism Website

-> It is built over HTML and CSS  
-> It is a static website which shows the pictures of beautiful places of India along with a short description of the place.

### Language Translator [↗](#)

This is an amazing project built using python. We can convert the entered text from any language to any other language using this project. I have used google's API to do this project..

### Internet Banking Chat Bot [↗](#)

This project is built using python. This is a chatbot which assists people while doing internet banking with GUI.

## Internships

---

### Consultant-TekIP private consultancy

-> I have learnt web scraping and web automation using Python through which I have written scripts to scrap websites.  
-> This was an offline internship where I have learnt many soft skills and got exposure to industry.  
->I have made use of Mysql, Django, and used python modules like pandas,numpy, paramiko, selenium and so on as part of the internship.

### Trainee-WIPRO

-> It is an online internship organised by WIPRO and I got good knowledge of Java concepts.
